

Service Agreement

This sample document carries Foxit eSign Text Tags for a single signer (party 1).
Each tag below uses underscore widths, which is the form the parser accepts.

Full name (required): \${textfield:1:y:Full_Name:_____}

Initials (required): \${initialfield:1:y:_____}

Date (required): \${datefield:1:y::_____}

Signature (required): \${signfield:1:y:_____}

*Tag text is left visible here for demonstration. In production, set the tag
text color to match the page background so signers never see the raw tokens.*
